

GARDEN LAMP — W1026

BRONZE, 1969

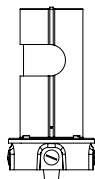

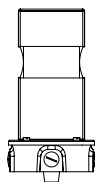

The Garden Spot is a cylindrical piece of cast raw bronze. Rotating structure for directing the light. This lamp is designed to blend discreetly into nature while gaining a natural patina over time very alike the one of a bark of a tree. This lamp has been endorsed and used by leading landscape architects and designers such as Jacques Wirtz and Jean-Noël Capart. General Decoration has manufactured this garden element since its creation in 1969.
