

# HEXAGONAL TABLE LAMP

**POLISHED BRONZE, 1969**

Table lamp, hexagonal polished bronze leg, paper shade. This lamp was created in the early 60s, inspired by a stone model of the Dunbar collection designed by Edward J. Wormley in 1959.

Jules Wabbes reinterpreted this classic model. The lampshade is simply held by three notched metal rods. The first copies made of travertine were produced by Mobilier Universel. They were later made of metal and distributed by GEDE in 1969.

There are many fakes of this model (larger or with flared foot) designed after the death of Jules Wabbes. The model here presented and currently manufactured by GEDE is the only original one.
